

ABRASIVE ARTICLE AND METHODS OF MAKING THE SAME

Abstract

An abrasive article and methods of making the same are disclosed. The abrasive
5 article includes a backing and an array of features on the backing. Each feature includes a
base and a body. The body includes a face having an undercut. In one embodiment, the
feature also includes a planar top portion having abrasive particles disposed thereon. In
another embodiment, the feature also includes a radiused portion on the undercut sidewall
adjacent the base.
